# User Qualifications (Optional License)

- Expiry of a User's Qualification automatically changes the User's access permissions.
- Qualification can be based upon an expiry date or a decrementing credit or count.
- Manage use of Car Parks, Vending Machines, Photocopiers etc through decrementing credits.
- Transactions of various amounts may be deducted.
- Configure Warning and Expiry actions to occur automatically.
- Send text or e-mail reminders to Users that their qualification or credit is about to expire.
- Update multiple User Qualifications or Credits simultaneously.

# Support for Intelligent LAN Access Module and Offline Behaviour.

- Supports connection and use of new Intelligent LAN Access Module (ILAM).
- Assignment of Offline Permissions.
- See Hardware Release Notes for further information on the ILAM.

# Additional Video Integration Plugins (Optional Camera Integration Licenses Required)

Video Integration plugins are now available for Integriti for the following CCTV vendor systems:

- Geutebruck
- Avigilon
- HIK Vision
- Milestone (MIP-SDK)

The exact scope of integration varies from one Vendor system to the next, however, many of these new interfaces support bidirectional alarm transmission. Not only can alarm events in Integriti be used to trigger actions on the CCTV system but video analytic information and CCTV alarm events may also be passed via IP from the CCTV system to Integriti.

Please refer to the individual CCTV Capabilities Guide on the Inner Range web site for confirmation of version compatibility and functionality.

# PRODUCT RELEASE NOTES Integriti Professional version 3.0

# GateKeeper for Integriti

- New "Auto Login" Feature added to GateKeeper.
- GateKeeper application may be used as a Schematic Noticeboard or Indicator Panel.

# Upload of Macros from Controller

- Macros may be uploaded from Controllers.
- Upload, View, Edit and Save Macros from within the Integriti Application, even Macros that originated from a Controller.

#### Integration Server

- New Integration Server section to collectively manage all Integrated Systems such as CCTV, Intercoms and Building Management Systems.
- Additional support for device integration.

# **Multiple Time Zones**

- Full Support for Multiple Time Zones.
- Date and Time Fields now use a Changeable Time Zone Offset.

#### **Time Filters**

- Additional "Recent" and "Previous" time filters.
- Time Filters are used extensively throughout the system configuration.
